

Homework Guidelines

Homework Philosophy

No matter how well you understand the course material, practice is required to gain facility with these concepts and calculations.

The homework is designed to give you this practice. The Homework Problems will be very similar to many questions you will find on the exams.

Homework Answers

Answers to the Homework Problems will be available on the course content page 5 minutes after the posting deadline for the assignment has past. (Homework is due Sunday night @ 10:59 pm AZ time, answers will be posted at 11:04pm AZ time)

It is the responsibility of the student to compare their answers to the answers provided and make sure that they understand any differences.

If you have questions about any of the answers, email the TA or instructor.

Grading Policy

Homework Problems are checked to see whether some concepts may need reinforcement or whether some students require extra help.

Each homework will receive a grade of:

- 5 pts if turned in on time
- **0 pts otherwise**

Remember this is 5% of your grade and all you have to do to get full credit is to get those Homework Problems done and posted on time!

Homework Problems can be posted to the dropbox at any time prior to the deadline.

Homework submission

1. Save the Homework Problems file as a document on your computer.

2. CHANGE the name of the file:

You must change the file name to include your LAST name

(i.e. Foote-HW01.doc)

3. You must include your name in the file as a header at the top of the document. If you don't know how to do this, search for Header in the Help function of the software.

4. Type your answers into the file.

5. Save.

6. Post: Prior to the posting deadline (see schedule), upload your finished version to the **appropriate dropbox.**

If you are using a software other than Word and cannot save as a word file you can save it as a pdf or print it and scan it then **submit the pdf.**
